

# Innovative. Responsive. Trusted.

## **A Customer-Focused Company.**

We are passionately committed to doing all the right things to help our customers be successful. We provide high-value technology, products and services through engaged employees who drive continuous innovation and operational excellence.

The work we do matters. Medical providers from clinics and single hospitals to large healthcare networks are upgrading their radiology capabilities using our systems. From developing X-ray products for general radiography, intensive care patients, pediatrics, sports medicine, dental practices or veterinary hospitals, to providing non-destructive testing systems to help ensure that airplanes, bridges and pipelines are safe. And much more.

We serve industrial markets around the world with our non-destructive testing products, enabling customers to capture high-quality images for applications such as aircraft inspection, assemblies, castings and forensics.

We also partner with progressive companies to commercialize customer-focused products by applying our precision roll-to-roll coating processes and large-scale manufacturing facilities for market opportunities that include energy storage, electronics, displays, automotive components and much more.

## **Carestream at a Glance**

- 2019 revenue approximately \$1.36 billion
- More than 4,400 employees worldwide
- Global headquarters in Rochester, NY USA
- David C. Westgate, Chairman, President and CEO

## ABOUT CARESTREAM

### Innovation That's Life Changing.

That is our vision for customers, patients and our communities.

### Strong Customer Focus.

Carestream has more than 755 patents granted worldwide. We are one of the top global providers of digital radiography (DR) and computed radiography (CR) systems with a track record for innovation, including our DRX family of DR systems that feature the advanced, wireless CARESTREAM DRX Plus Detector, which is compatible across all our DRX equipment.

Our Non-Destructive Testing organization has a proven track record in serving industrial safety and inspection markets. Our customer-focused development teams continually work to make sure our NDT products can perform high-quality radiographic testing anywhere in the world.

## HOW WE SERVE CUSTOMERS

### Medical Imaging

Scalable solutions to meet your needs today and tomorrow:

- Flexible DR and CR solutions that solve workflow, budget and space challenges while reducing procedure times.
- Imaging systems combining fluoroscopy and general radiography capabilities in a single, compact unit.
- 3D extremity imaging systems that allow for patient weight-bearing diagnostic imaging exams.
- Laser imagers for printing medical images of all types, including CT, MRI, ultrasound, CR and DR with gold-standard X-ray film technology known for quality and performance.
- A broad range of valuable professional services, including project management, technology consulting and site planning.

### Non-Destructive Testing

We offer a rich portfolio of high-quality products for a wide range of industrial applications.

### Manufacturing Partnerships

Partnerships with our Contract Manufacturing group provide access to Carestream's precision, roll-to-roll coating expertise and capacity to bring coated products through commercialization and to market in myriad applications, industries and technologies.

## CUSTOMER SATISFACTION IS OUR HIGHEST PRIORITY

Customers are the beginning and end of everything we do. Our customers have helped build our organization into a leading global company and our long-term success is based on customer relationships and our reputation. We are committed to exceeding the expectations of customers, dealers and partners – and to being a market leader.

Carestream Health has been part of the Onex family of companies since 2007.
